DETAILED ACTION
EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Marc Hanish on June 14, 2004.

The application has been amended as follows:

CLAIMS

2. In claim 19 at line 8 delete the word 'device'.

Allowable Subject Matter

3. Claims 1-25 are allowed.
4. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claims 1-18 is the inclusion of the limitations: defining a correlation rule comprising at least one segment, each segment comprising a plurality of executable codes, said at least one segment comprising a plurality of markers, said correlation rule defining a relationship between two or more of said markers; determining whether one of said at least one segment is corrupt by applying said correlation rule to said two or more markers read from said device; and indicating

Art Unit: 2113

whether one or more of said at least one segment is corrupt based upon said determining.

The primary reason for the allowance of claims 19-24 is the inclusion of the limitations: each segment comprising a plurality of executable codes, said at least one segment comprising a plurality of markers, said plurality of markers including interrelationships defined by a correlation rule, said processor further configured to read two or more of said markers from said memory device and to apply said correlation rule to said two or more markers to indicate where one of said at least one segment is corrupt based upon said applying.

The primary reason for the allowance of claim 25 is the inclusion of the limitation defining a correlation rule for a program comprising a plurality of executable codes, said program further comprising a plurality of markers, said correlation rule defining a relationship between two or more of said markers; indicating whether said program is corrupt based upon the application of said correlation rule to said two or more markers. These limitations are listed in the claim. No prior art references included any of these limitations and they are seen as being nonobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
